

# SAVING THE LAST WILD PLACES

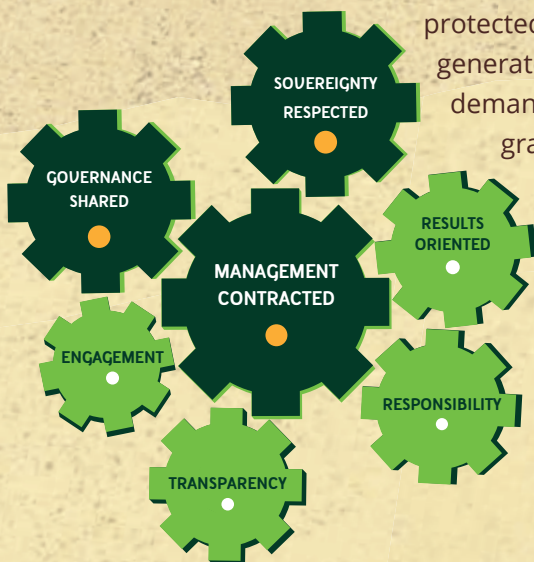

## Our solution to the global challenge

Our planet is experiencing a dramatic decline in biodiversity with a 60% reduction in vertebrate populations since 1970. In the effort to counter this mass extinction, protected areas have proven essential to safeguard biodiversity and generate socio-economic benefits. Despite this fact, the increasing demand for energy, food, wildlife products and infrastructure has gradually exerted pressure on these areas, especially in Africa

where human pressure has intensified. Consequently, NGOs, national authorities and financial partners have developed long-term partnerships models, in which governments set objectives and policies and rely on the technical capacities of partner NGOs for the day-to-day management of the protected areas. Convinced by this model that has provided tangible results, "Parcs de Noé" was born.

## Who we are

Parcs de Noé was created in 2018 as a branch of the French NGO Noé. Our goal is to safeguard biodiversity in protected areas through a delegated management approach, involving responsibility, accountability, security and local development. The support of the French Development Agency and the European Union made it possible to build its structure and to assume the management of the first protected areas. New partnerships are developing in order to secure more wild spaces in the long term.

## Our ambition

Our ambition is to safeguard and restore the last wild spaces, for the species that depend on them, and to preserve ecosystem services that are providing livelihoods for human populations and resilience to climate change.

2018

### TERMIT TIN-TOUMMA RESERVE NIGER

The Nigerien government trusted Parcs de Noé to manage this huge desert Reserve of 86.000 km2 for the next 20 years.

2019

### BINDER LÉRÉ WILDLIFE RESERVE CHAD

A Partnership Agreement was signed with the Chadian government for the conversion of a part of the reserve into a National Park, and setting up the basis for its management.

2020

### CONKOUATI-DOULI NATIONAL PARK CONGO

Following a tender, Parcs de Noé was selected by the Congolese government for the management of the Conkouati-Douli National Park.

2021

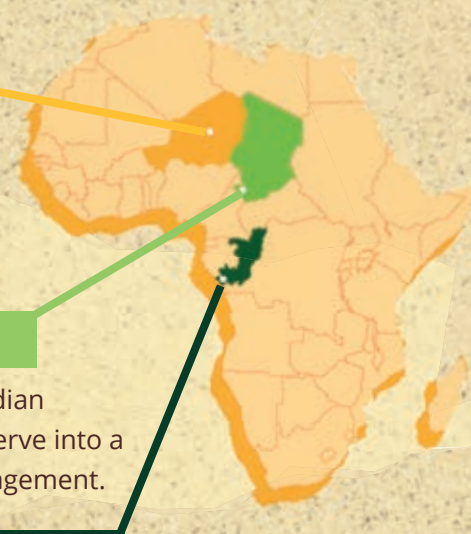

### 3 PROTECTED AREAS UNDER MANAGEMENT

Noé signs agreements for the management of the Conkouati-Douli National Park in Congo for 20 years, and for the Binder Léré Wildlife Reserve including the National Park under creation in Chad for 15 years. **Noé now manages 3 protected areas.**

2025

### 5 PROTECTED AREAS UNDER MANAGEMENT

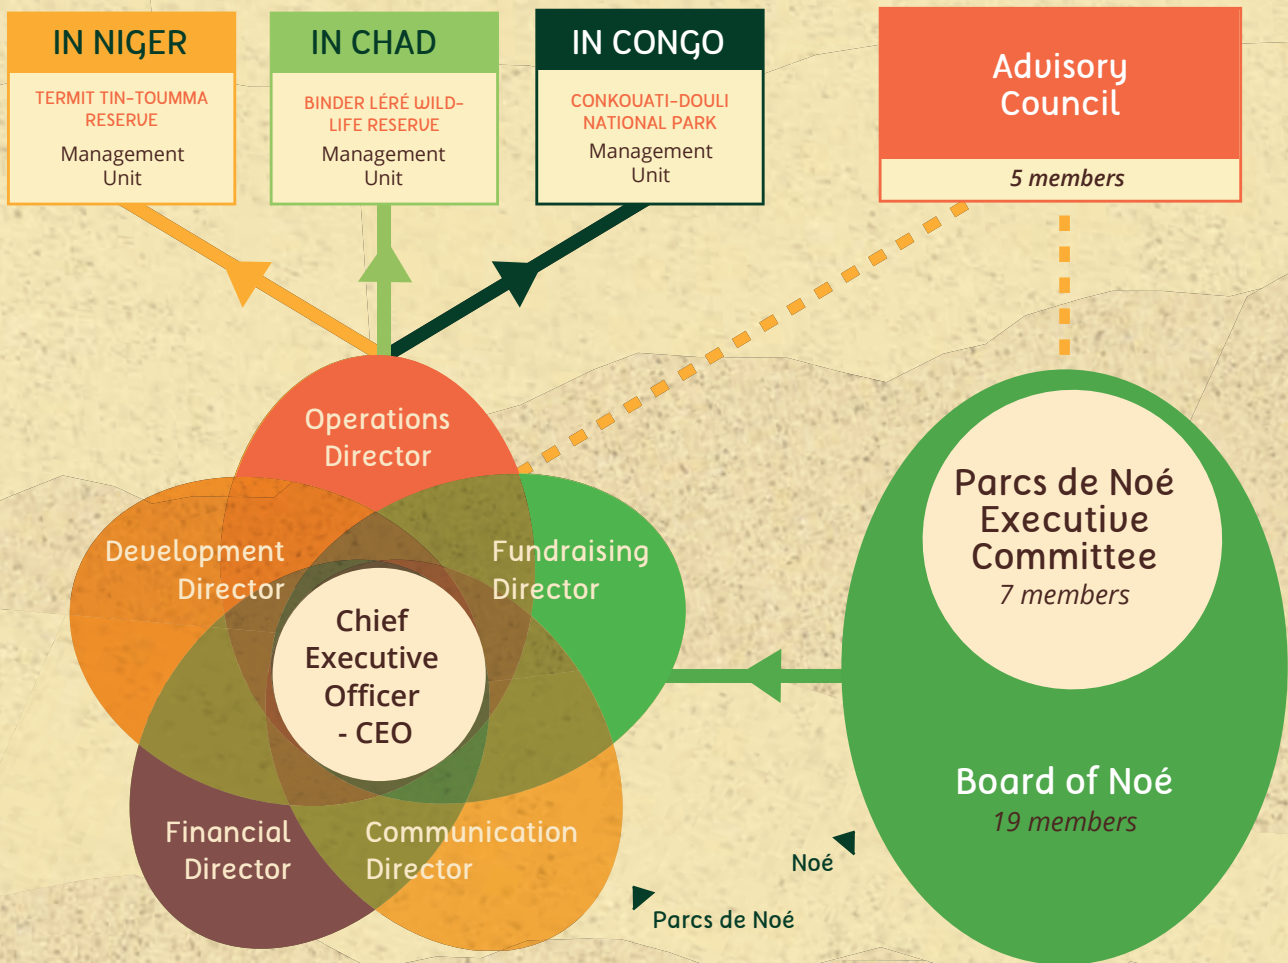

Parcs de Noé aims to safeguard 5 Protected Areas representing 10 million ha of Africa's principal ecosystems; desert, savannas, forests and marine and coastal ecosystems.

## Our governance structure

## A unique partnership

A partnership with African Parks allows us to benefit from 20 years of experience in more than 19 protected areas in 11 countries in Africa. This includes guidance on operations, participation in the boards of protected areas managed by Parc de Noé, and a continuous monitoring and evaluation process of the partnership. African Parks is a non-profit conservation organisation that takes on the complete responsibility for the rehabilitation and long-term management of national parks in partnership with governments and local communities. To scale its impact, African Parks, through its Incubation Program, invests in practitioners who share its ambition and values, and who, with mentoring and technical support, can be cultivated to replicate its model of delegated management.

### Parcs de Noé exists thanks to its partners

[www.noé.org](http://www.noé.org)

Parcs de Noé is a program of the NGO Noé, which is a non-profit public nature protection organisation created in 2001. Noé has programs in France and around the globe to safeguard biodiversity for the benefit of all living, including the human species.
